

Engineer's Week Celebration

Keynote Speaker: Cathy Leslie
Executive Director—Engineers
Without Borders

Engineering with a Human Face – According to Dr. Paul Polak of International development Enterprises - the majority of the world's designers focus all their efforts on infrastructure for the world's most affluent customers. EWB-USA believes that it is time for the rest of the world to benefit from the technical expertise that the engineering profession can provide. EWB-USA is a humanitarian engineering organization that is dedicated to developing communities and to contributing to the betterment of the engineering profession. Our areas of expertise span the engineering disciplines and provide solutions for water, sanitation, energy, shelter, health, food, and education for developing communities. Cathy Leslie, ED of EWB-USA will provide an overview of the organization and how it can be incorporated into both your volunteer and daily lives.
