IEEE COLUMBUS PES MEETING

IEEE PES SEPTEMBER 2008 PROGRAM

Date: Tuesday, September 23, 2008

Meeting: 6:00 to 7:00 pm

Location: AEP Building, 700 Morrison Rd, Conference Room 2C

Refreshments: 5:30 to 6:00 pm

Earn 1.0 CPD Hour

Title: Applied LiDAR technology for Transmission and Distribution: Vegetation and Engineering demands solved from one data set.

Adam Rousselle is the president and founder of UMRC, a utility focused risk management services company. Prior to founding URMC in 2005, he spent over 15 years working internationally in the sawmill, logging, and related industries.

Early in his career, Rousselle partnered with NASA experts and academics to develop remote sensing technologies to identify and inventory timber and forests. That work resulted in the founding of Falcon Informatics, a leader in forest information services and solutions for owners, investors, and insurers of forestland around the globe.

He sold Falcon Informatics in December 2005, by which point the company had analyzed more than 4.5 million acres of forest in North and South America, Indonesia, Finland and Brazil for clients such as Fort Benning, Boise, UPM Kymmene, The Bureau of Land Management, Forest Capital Partners, Forest Systems, Fort AP Hill, and others.

Rousselle founded URMC in 2005 to focus exclusively on serving the utility industry. URMC currently serves some of the largest utilities in North America and is partnered with leading software and engineering firms focused on the utilities industry.

Presenter: Mr. Adam Rousselle

PLEASE RSVP to Howard Jones by email hrjones@aep.com or by phone at 614-552-1107 by 5:00 pm, September 22nd

Advise when you RSVP, if IEEE Member and /or P.E.

**IEEE Members and guests are cordially invited to attend
